# Happy Senso

Happy Senso is a gel with multi-sensory properties. It stimulates multiple senses all at once and its intensity can be varied by applying it in several ways. You can hear, feel, smell and see it. There is also a cooling effect on the skin. A wonderful product for sensory stimulation.

It's fun to use, makes eyes shine with enthusiasm and provides beautiful contact moments. Happy Senso is of the highest quality and has been dermatologically tested. Highly appreciated by occupational therapists

£12 per can or £42 for all four.
